

## 長庚大學期中、期末考試答案用紙

學年度 第 學期 考 姓 名 楊子媛 學號 130729021[3] (a)  $\mu_A = 65$ 

$$\frac{\sigma_A^2}{n} = \frac{9}{25}$$

$$Z = \frac{\bar{X}_A - \mu_A}{\frac{\sigma_A}{\sqrt{n}}} = \frac{\bar{X}_A - 65}{\frac{3}{\sqrt{25}}} = \frac{5(\bar{X}_A - 65)}{3}$$

$$P(\bar{X}_A \leq 64) = P\left((\bar{X}_A - 65) \cdot \frac{5}{3} \leq (64 - 65) \cdot \frac{5}{3}\right) \\ = P\left(Z \leq -\frac{5}{3}\right) = 1 - P\left(Z < \frac{5}{3}\right) = 1 - \text{st.norm.cdf}\left(\frac{5}{3}, 0, 1\right) = 0.0478 \#$$

(b) 同上, 0.0478 #

$$(c) P\left((\bar{X}_A - 65) \cdot \frac{5}{3} \leq (\bar{X} - 65) \cdot \frac{5}{3}\right) = P\left(Z \leq (\bar{X} - 65) \cdot \frac{5}{3}\right) = 0.05, (\bar{X} - 65) \cdot \frac{5}{3} = \text{st.norm.isf}(0.05, 0, 1) = 1.645$$

$$(d) P\left((\bar{X}_1 - 65) \cdot \frac{5}{3} \leq Z \leq (\bar{X}_2 - 65) \cdot \frac{5}{3}\right) = 0.09$$

$$X = 1.645 \times \frac{3}{5} + 65 = 66 \#$$

$$\text{st.norm.ppf}(0.05, 0, 1) = (\bar{X}_1 - 65) \cdot \frac{5}{3}$$

$$\bar{X}_2 = 66$$

$$\bar{X}_1 = 64.013$$

$$(\bar{X}_1, \bar{X}_2) = (64.013) \#$$

[1] (a) 答題

(b)  $S^2$  抽樣分佈(c)  $S^2$  抽樣分佈

(請翻面繼續作答)
